I'm a front end developer currently residing in Lisbon, Portugal.

I'm fluent in HTML, Javascript and CSS, comfortable with PHP, LAMP development and graphic design. Tools like npm, Webpack, Git and many others, are an integral part of my daily workflow. I'm comfortable working in an Agile environment and doing TDD, BDD and code review.

I strive to keep up with the latest trends in design & development and to find ways to implement new tools and processes into my workflow. My focus is first and foremost on "user experience". I believe that the ultimate goal of a web site is to be available and usable on any device, on any connection, by any person.

EMPLOYMENT

FRONT END DEVELOPER at

CREATIVES TERMINAL

2016—

I'm currently developing the Creatives Terminal web application as a SPA entirely in React, using the latest technologies, and also using TDD. I'm involved in defining the UI and UX of the application. I've been able to help define many of the technologies and methodologies used in the project. I also collaborate with the back end developers to define the API used by the application.

WEB DEVELOPER at

OTHERS DIGITAL THINKING

2011—2016

During my time at Others I developed web sites, Facebook applications & page tabs and mobile applications. At times I was involved with prototyping, wireframing and design. I often worked closely with other development agencies as well as clients of various sizes and areas of expertise. I introduced several new tools, technologies and methodologies that have been adopted by its other members.
